

I am a customer of Sonic.net and have stayed with them for years because they have provided me with excellent service at great prices. If you allow the larger companies to have their suits passed, then we, the people with low income, would not be able to afford the high priced, low customer service of those bigger companies. All I can tell you is that SBC is HORRIBLE!!!! I've had them before and had to have the Public Utility Commission ride them about false bills they charged me and to this day, the creditor they sold my account to STILL bothers me!!! I, as an American Citizen, do NOT support large telephone monopolies or ANY large business monopolies for that matter!!!
